

Final Regulatory Flexibility Analysis

Clearinghouse Rule 14-044, Natural Resources Board Order CF-12-13

Revisions to ch. NR 166, Wis. Adm. Code, will have minimal impact on small businesses. Streamlining the program may result in slightly less costs for municipalities to make improvements to their infrastructure projects, which could mean more engineering and construction jobs available. The proposed rule revisions would also remove some uncertainty regarding requirements that must be followed for the engineering and construction companies involved in SDWLP (Safe Drinking Water Loan Program) projects.
