Assumptions Used in Amiring o	t Fiscal Estimate				
Assumptions Used in Arriving at Fiscal Estimate					
This emergency rule is not expected to have any major economic impact.					

- It exists to clarify the existing rules and to prevent unequal requirements being placed on entities that operate in a very similar fashion under the same code.
- It has no impact on mobile establishments currently licensed by DHS, since their bases are already licensed.
- It only impacts some mobile establishments currently licensed by DATCP that have bases other than in currently licensed facilities.

By implementing equally-enforced licensing and food safety provisions, the proposed emergency rule will ensure Wisconsin's food regulations uniformly impose provisions for protecting public health. This emergency rule and the permanent rules that will be promulgated to amend the existing rule will be part of the larger initiative to consolidate and streamline Wisconsin's food safety programs. It will result in the removal of confusing inconsistency in regulatory requirements and ensure consistent application of retail food establishment regulations, regardless of whether the business serves meals and is a restaurant.

The emergency rule is not cost-neutral – license fees for some retail food establishment bases may increase if those establishments do not have a currently-licensed base - but the rule will achieve industry-wide equity in the mobile category because it mandates a license for a portion of the mobile retail food establishment operation (the base) that is already required for mobile restaurant bases. An increase in cost for a mobile retail food establishment base will be matched by service from the Department in food safety inspections at the locations where the mobile retail food establishments are cleaned, sanitized, provisioned, and stored. In many cases, the business serving as a mobile retail food establishment base may already be licensed and inspected as a food processing plant or other food business. In this case, no additional fee will be required.

The rule does not have an effect on all retail food establishments.

- Those already licensed as mobile restaurants will not be affected since their bases have the requisite license under the rules of DHS.
- Mobile retail food establishments that operate at special events or temporary events will not need this license
- Mobile restaurants operating at temporary events such as farmers' markets currently do not need it

Long - Range Fiscal Implications

This emergency rule will expire on November 27, 2016, but the language is expected to be incorporated in a new ATCP 75. There will be a slight cost to those establishments now doing business as DATCP – licensed mobile retail units, but it will establish licensing equality among those establishments and similar establishments now licensed by DHS. The long range impact will likely be negligible as new licensing fee-structures based on the type and complexity of business for all food storage, processing, and sales are adopted over the next several years to accommodate the rapid diversification that is occurring in the food industry. The new few structures will be imposed across the board but will take into account the size, scope and complexity of the operation and the cost will be calculated on the amount of risk posed by the operation and experience/training needed to effectively regulate it.
